This list is based on 4-5 years of material in the Chinese publications of "The Watchtower" and "Our Kingdom Ministry". By learning the first 100 words you understand over 41% of those two publications and then the first 200 words/over 50% respectively.

The English definitions, instead of trying to be comprehensive, endeavor to express the most basic and obvious meaning of the characters used in our ministry and in the congregation activities. Definitions for single characters concentrate on the meaning of them as they are, not the meanings they may have in different combinations. The verb definitions are placed in the front and the "to" preposition is used to indicate them clearly. When applicable, the other word group definitions follow. MW = measure word. NW = usually unique to the New World Translation.

This list is prepared as three versions, the first by the numbers and then two others by the alphabets, one according to the pinyin and another by the English column. New improved versions can be published when the feedback points out any typos, mistakes or other suggestions.
